

TRAIL SIGN GUIDE

- BLAZER** - To make sure that you are on the designated trail, watch for the blazer. Where trail exits and entrances are minimal, they will be kept to a minimum.
- DIRECTIONAL ARROW** - This arrow will advise trail users of a change in trail direction where your speed should be reduced to negotiate a curve or corner.
- CAUTION** - Look for caution signs to warn you of a change in trail condition. Prepare to reduce your speed.
- STOP & YIELD** - Stop signs are used to halt users on a snowmobile trail at road crossings, highway bridge crossings, public railroad grade crossings or trail intersections.
- BRIDGE, CULVERT & HAZARD MAKER** - Snowmobile bridge and culvert crossings are signed with reflective black and yellow hazard markers. Used in pairs, they mark the opening through which you must pass.
- CORRIDOR SIGNS** - A sign like this one designates major travelways out of metropolitan areas and major north-south and east-west corridors. It has a blue background with a white badge symbol.

- SNOWMOBILE ROUTE SIGNS** - The main use of this sign and route arrow is to inform snowmobilers that it is permissible to use the traveled portion of the road or highway. It also alerts traffic that snowmobilers are using the road for travel. The arrows inform trail users which way to proceed on a road or highway. Where the trail begins again, a blazer will indicate the direction that the trail takes.
